Art Unit: 3622

Notice Of Non-Responsive Amendment

The response filed on May 11, 2005 is not fully responsive. First, the Objection to the drawings has not been fully addressed. For example, new figure 1A and 5A have shown or conveyed no relevant information besides the **Void Portion** in the upper section. Second, an English translation, of at least the abstract, of the French document was not provided as requested. Third, it is unclear whether the new drawings and the changes to the specification have introduced new matter in the specification. The Examiner felt compelled here to raise these issues, thereby making sure that no new matter was introduced before proceeding with an examination of the claims on the merits. The Applicant is given one month to reply to this communication and to call the Examiner to at least discuss the new drawings and the changes made to the specification.
